Petro Silenius

FRONTEND DEVELOPER

Work Experience

FRONTEND DEVELOPER

Lyyti Oy | 2019 - present

Developing a B2B SaaS event management product. Most recently I've played a big role in the technical rebuilding of the product and constantly onboarded new developers to the team. On top of daily development tasks I improve our engineering practices, organise events and figure out architecture level solutions to bigger features. Also worked 7 months as a Scrum Master.

CEO AND FOUNDER

Dataatti Oy | 2020 - present

We founded Dataatti with two of my university friends after winning Turku's hackathon and wanted to offer young and innovative takes on customer needs. As a trio we help customers create user-driven software to make everyday business easier.

Education

MASTER'S DEGREE, COMPUTER SOFTWARE ENGINEERING

Turun yliopisto - University of Turku| 2020 - 2021

My thesis introduces a model for utilising user research in product development and how it can be used to gain value in desicion-making scenarios. My minor was in Global Technology Management from Turku School of Economics.

BACHELOR'S DEGREE, COMPUTER AND INFORMATION SCIENCES

Turun yliopisto - University of Turku | 2017 - 2020

My bachelor's thesis discusses bringing users into the product development process through user integration. My minor was management and organisation from Turku School of Economics.

Personal Profile

I'm a frontend developer with my eyes on the future. I advance company goals by driving development forward and being vocal about my thoughts. I enjoy collaborating in projects and building a team spirit together

Technologies of choice

- React
- Next.js
- Typescript
- PHP

Fun facts
